

Fukushima Prefecture Wide Area Cycling Route 《Northern area of the prefecture》

■ Area themes and stories

Fukushima Prefecture has established "Fukushima Wide Area Cycling Routes" in seven areas, making use of the prefecture's beautiful natural environment and abundant tourism resources.

In recent years, peaches and other fruits have been highly rated overseas, making the prefecture the largest producer of them all, and exports are now higher than they were before the earthquake. There are also many attractive hot springs, such as Iizaka Onsen, Tsuchiyu Onsen, and Dake Onsen, which are known as the three most famous hot springs in Oshu. While touring fruit-producing regions and hot springs, you can enjoy magnificent panoramic views of nature, including the Abukuma River, Mount Azuma-kofuji, and Mount Adatara.

■ Total route length: Approximately 85 km
