

Message to Fukushima

Name: PURI BIPI

Nationality: NEPALI

Current Address: (Fukushima ken, iwaki-si)

Namaste, I am from Nepal and I came Japan before 2 years ago. When I told my parents I want to go to study in Higashi international university which is in Fukushima prefecture in Japan. They are worry about me and they weren't ready to give me the permission but I forced them to let me come to Fukushima and at last I came here to my further study. When I came here I find different then which I heard from other people and I live my life very happily here. We all know after the great east earthquake people are suffering from many problem. But its natural disaster and nobody can stop it. By forgetting all their pain they recover their land, places, property as like before. I find many different here in these two years and people of Fukushima are very kind and helpful. They are helping each and every people who are in problems. I found that people of Fukushima are doing hard work to standup like before and make the life happy. The reconstruction work is still on process. I want to say that I am a foreign student and I don't think and find any different if I compare to the others. Fukushima's life is not difficult and here is not any problem. We are also doing recovery activities like other people. I always tell my friends that Fukushima is good and safe place. Its wake up now and future to. I want to request to all lets work together, and together can make difference. I will make my future from Fukushima. One day the whole people's thinking will be changed and it will be returns in the same phase just like before and it will be very famous for the natural resources, cultures and traditions.

Its wake up and stand up now just like before if you have time to take rest or go somewhere far away from Fukushima please come enjoy this place.

Thank you
