

ACTION PLAN NO. 4

Fukushima Action Plan – Pioneering in Renewable Energy

Action Plan

Based on the “Fukushima Prefecture Renewable Energy Promotion Vision 2021” formulated in December 2021, our action plan promotes a leap forward in renewable energy by sharing and implementing each of our current initiatives among all parties concerned.

Our Goals

Renewable Energy Introduction Targets

Targets for introducing renewable energy in relation to the prefecture's energy demand

FY 2024: 57.0%

Promotion vision implementation target: FY 2030: 70%, around 2040: 100%

Increase in output of renewable energy in the prefecture (excluding large-scale hydroelectric power) (FY2022-2024)

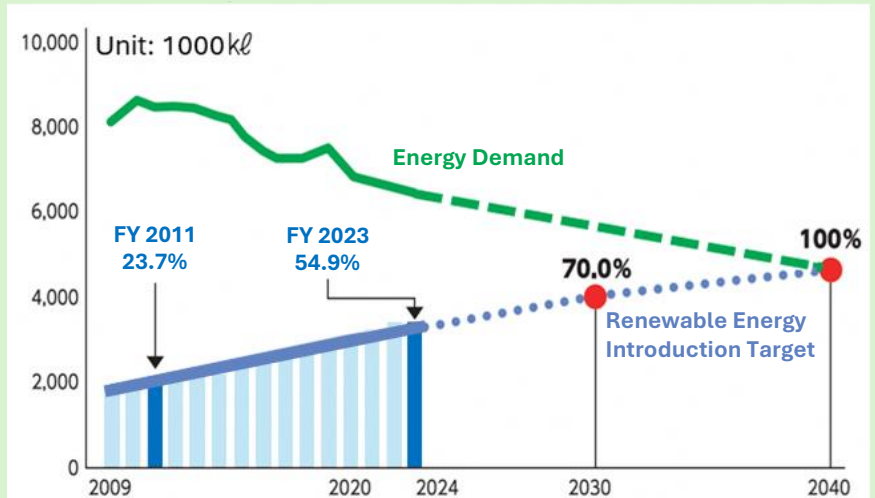

+980 MW

Targets for introducing renewable energy in relation to the prefecture's electricity demand

FY 2024: 97%

TARGETS FOR INTRODUCTION OF RENEWABLE ENERGY

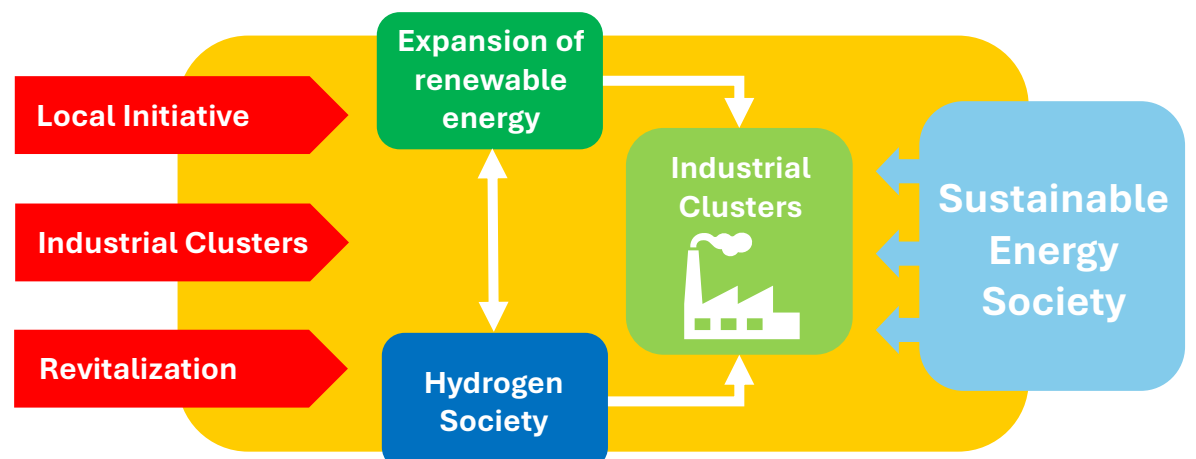

(in crude oil equivalent)

Pillars We Build On

Our initiatives are organised into four pillars of action:

- ① Expansion of renewable energy introduction
- ② Accumulation of renewable energy-related industries
- ③ Realization of a hydrogen society
- ④ Building a sustainable energy society

Our Principle of Revitalization: Creating a safe, secure, and sustainable society that is not dependent on nuclear energy.
